

Managed GPS Tracking Solutions

Marlowe Connect is Marlowe Fire & Security's purpose-built Alarm & Video Receiving Centre (AVRC). The NSI Gold, Cat II, AVRC, protects people, property and peace of mind by monitoring Tracker Alarms, Panic Alarms, Fire Alarms and Intruder Alarm signals from systems installed anywhere in the UK. Operating 24/7, Marlowe Connect receives all alarm activations and takes the appropriate action, contacting Keyholders or the Emergency Services as required.

Combining the latest GPS tracking software with powerful cellular positioning technology, we can provide you with a powerful, real-time tracking solution that can be used to keep visibility of your assets anywhere in the world. The Managed GPS Tracking Solutions combined with our SIA trained Operatives have been responsible for a number of prosecutions and the recovery of many thousands of pounds worth of stolen goods.

The Technology

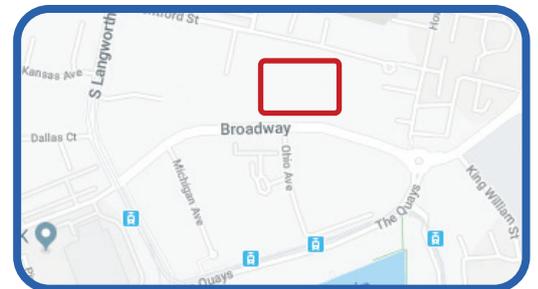

Each device utilises the latest GPS tracking module to instantly pinpoint your assets location. This information is communicated directly to Marlowe Connect from anywhere in the world.

Once the device is fixed in a static location a geo-fence is drawn around its position. If the asset leaves the geo-fence an alarm is generated and sent to directly Marlowe Connect.

Each alarm is sent with pre-agreed instructions to a trained Operative who will locate and track your device in real time and if necessary guide the police straight to its position.

As soon as your device is up and running you will have the ability to check the location of your asset through the Online Tracking Interface. The secure interface can be accessed whenever you wish via any web browser, so that you can feel safe in the knowledge that we have full visibility of your people and property at all times.

A Bespoke Solution

Marlowe Fire & Security is able to provide you with a range of proven GPS Tracking Solutions that suit your needs.

PRODUCT

SCPT002

80mm X 50mm X 25mm

Tailored to suit your needs, our Product Trackers can be designed to hide within your products. From cigarettes to computers, our Product Trackers monitor your assets 24/7.

VEHICLE

SCVT001

67mm x 50mm x 27mm

Vehicle tracking at its simplest, installed in just seconds by simply plugging into your vehicles OBD-II diagnostic port. Our Vehicle Tracker allows you to locate your vehicle instantly.

CASH

SCCT001

150mm x 80mm x 10mm

Our Cash Trackers are designed to sit within your safe and protect your money. Should anything happen, an alarm will be raised and we will guide the police to the location of your money.

PEOPLE

SCLW001

92mm x 44mm x 18mm

Our Lone Worker Solution is a practical and robust tracking device that can be worn by your employees to provide isolated members of staff with a safe and protected environment.
