

## Are your doors COVID-secure?

As people start returning to work, businesses will have a responsibility to minimise the risk of COVID-19 within their premises.

In line with the Government guidance, Marlowe Fire & Security has a range of solutions to help businesses get back up and running and workplaces operating as safely as possible.

Designed for use in access control systems, the no-touch door release exit button offers a hygienic solution to unlocking doors by eliminating the use of outside door handles, a major source of contamination.

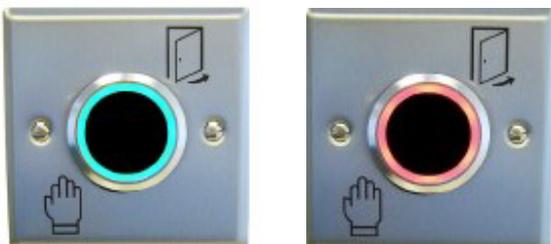

## Reduce the transmission of infection with Contactless Door Control

Having no-touch operation is crucial for environments where hygiene is critical, and this infra-red driven contactless exit button is an impressively low-cost solution which can be easily retro fitted to an existing system.

The circular surround to the infra-red sensor hosts a ring of LED lights, which in 'standby' state glows red, drawing attention to the door release button, and switches to green as soon as a hand (or object) is presented within the defined range.

The smart stainless steel plate with the LED illumination provides a modern and aesthetically pleasing solution to a building's door entry/exit system.

The unit has been designed to fit into a standard singlegang way, and there is also a surface-mount kit available, should you wish to have it proud rather than flush fitting into the wall.

### Applications

The devices are particularly suited for use in hospitals, laboratories, engineering facilities, food preparation and serving areas and premises accessed by a variety of users e.g. schools and care homes. They are also ideal for buildings used by disabled or elderly people.

### Features

- Discreet surface mount design
- Touch-free activation
- Red LED turns Green when activated (interchangeable)
- Made from durable stainless steel
- Adjustable latch time from 0.5 to 30 seconds
- Adjustable trigger distance from 4 - 15cm
- Designed to prevent any interference with other infrared devices
- Long life: infra-red sensor: 100,000 hours, relay: 1,000,000 operations
- IR switch component is IP65 rated
- 1 year warranty

### Benefits

- Ensure your compliance with COVID-secure guidelines
- Reduce the risk of cross-contamination
- Fast deployment
- Cost effective

### Back to Business Solutions

We have a range of solutions to ensure your business is Covid-secure including:

- Fever Screening
- People Flow Control
- Hygienic Door Solutions
- Portable Sanitisation
