

## Unified security solutions

The world is constantly changing, and so is the nature of threats your organisation must face. Working in partnership with the industry leaders of unified security solutions, Genetec, our security solutions provide the foundation you need to build a system that keeps up with your needs for years to come.

A unified approach to security gives you the information you need to make the best decisions and respond quickly.

## See the full picture in one place

Each of our systems are part of a single unified security platform, Security Centre. Genetec's Security Centre delivers a comprehensive view of events in one location, allowing you to unify all of your data so that you can manage security policies, monitor events, and run investigations. Its extensive ecosystem lets you expand your system with the technology you need to face emerging threats, and since it's not focused on one narrow set of tasks, it accommodates new data types seamlessly in one interface.

Monitor your video surveillance, access control and automatic number plate recognition systems in one place. With a single interface to master, your team spends less time in training, and since it was designed to unify your entire security environment, it provides a familiar experience even as your system grows, unlocking new gains in efficiency.

## Features

### Modernise your core systems

Manage video, access control, number plate recognition with intrusion management, communications, and more.

### See what's happening clearly

Stop going back and forth between applications. Monitor all security events and manage responses from a single location.

### Scale inside and outside your organisation

From a single building to a worldwide network, Security Centre makes it easy to manage growth and collaborate with stakeholders.

### Transition to the cloud at your own pace

The choice is yours. Augment your system with connected services, migrate parts of it, or deploy it all in the cloud.

## A single platform that evolves with you

Security Centre incorporates access control, video surveillance, ANPR (Automatic Number Plate Recognition), communications, and intrusion detection.

Through an open architecture approach, you further strengthen your security by tapping into a suite of core modules, add-ons, and integrations with third-party security devices and systems.

## Cloud based video

Connect your cameras to the cloud, eliminating the need for on-site servers and allowing you to monitor your sites from anywhere.

- ✓ **Encrypt data between your devices to the cloud**  
Encryption is critical to upholding the protection of your data and security systems. With cloud solutions, all information that is sent between your devices to the cloud is fully encrypted. So, even if a cyber criminal gains access to your data, they won't be able to read or see it without an encryption key.
- ✓ **No need for servers - reduced risk**  
With a true cloud solution, you only need your cameras. There are no servers to maintain and install. That means there are fewer points of entry for potential attackers to target. With less vulnerability, your network and business are more resilient.

## Benefits

### Increased efficiency and awareness

Through unification of core security systems, you achieve greater operational efficiency and heightened awareness of your security environment.

### Reliable and cybersecure

Have your system available whenever you need it. While built-in failover and redundancy work to safeguard system access and limit interruptions, advanced security mechanisms (encryption, authentication, authorisation) protect privacy by preventing unauthorised access to sensitive data.

### A consistent experience

From system configuration and management, to live monitoring, reporting, and mobile access, operators enjoy the same, intuitive user experience across your entire security system.

### Flexible and scalable

Enhance Security Centre with Genetec modules and 3rd party add-ons. It seamlessly scales to hundreds of sites, and thousands of cameras, doors, intercom devices, and intrusion panels.

### Efficient deployment and maintenance

Organisations experience real savings in deployment, maintenance, training, and day-to-day management of security. Also, avoid the compatibility issues typically faced with the integration of multiple independent products.

### A clear path to the cloud

Reduce IT infrastructure costs with our cloud services. With Security Centre SaaS edition, cloud archives, automated updates and health monitoring, your organisation becomes more agile and less dependent on hardware.
