

See everything, miss nothing.

Many frontline workers who engage with the public frequently face confrontational behaviour or disputes from the public. Body worn cameras are proven to reduce conflict, improve personal safety and help secure criminal prosecutions by providing encrypted and tamper-proof video and audio evidence.

Providing staff with body worn cameras can help diffuse situations, allow you to react faster in an emergency, record key events exactly as they took place and supplement other video, audio and eyewitness records.

Real-time, high quality video recording

When the emergency button is pressed, the camera will automatically start recording, and immediately trigger the emergency alarm to the control centre. Pre and post recording video buffer captures events for up to 30 seconds before/after the user turns the video recording on/off.

Push-to-talk over cellular with group calling

Stay connected anywhere, anytime with messaging, audio and video communication. Advanced noise reduction technology allows for loud and clear audio, even in noisy environments.

Workforce safety

Protect the safety of your employees. The sooner an emergency is triggered, the quicker your organisation can react.

Presence and location awareness

Built in GPS enables real-time tracking location, and can save valuable response time in the event of an incident.

Cloud storage

Data is automatically uploaded to the cloud, and can be remotely accessed by users wherever they are. No risk of loss or theft of personal data, and no excessive data charges.

Simple & effective evidence management

Securely store and manage all your high definition digital evidence. Save time and share your evidence quickly and efficiently via an access link.

Features

VM780	VM580D
<p>Taking bodycams to the next level with the most advanced range of features available including:</p> <ul style="list-style-type: none"> • 2.8" touch display • Powerful battery life - up to 8 hours continuous recording • 3G/4G & Wi-Fi for real-time transmission anywhere • GPS built-in • PoC application compatibility • 1080P high definition display • Built in radio providing PTT to broadband and radios 	<p>Precise and effective recording via a HD camera with an immediate playback function of videos.</p> <ul style="list-style-type: none"> • Compact bodycam size & friendly UI • 1080P with infrared night vision • All-time positioning through bodycam GPS • Built in radio providing PTT to broadband and radios

Applications

For many years body cameras have been proven to deter aggression and provide an independent account of incidents for blue light workers such as the police, ambulance workers and firefighters to enforce the law and for safety.

But it's not just law enforcement who face situations where body cameras can make a difference. NHS frontline workers, care workers, teachers and retail staff are also regularly in situations where they face disruption or aggression.
