

A fully connected CCTV solution

Marlowe Fire & Security, the UK's leading fire safety and security service provider, is working in partnership with CSL to provide a fully connected CCTV solution.

For CCTV installations where a fixed line or broadband connection is unavailable, the CSL router is the perfect way to provide an instant, reliable and high speed connection.

Each CCTV Router Solution is provided to you with an integrated SIM card to deliver an easy, low cost and reliable way to ensure your security is not compromised.

Protecting People, Property & Peace of Mind

The CSL Router GW1000

The GW1000 Series Router is a compact and discrete 3G/4G router with two 10/100 Ethernet ports and Wi-Fi capability.

Each Router is supplied with an appropriate SIM for their usage. There are a range of connectivity options available to suit your requirements.

In instances where broadband is already available the addition of the CSL Router with the End Point configuration can upgrade any existing broadband service to an Instant Private Network.

Key Features

Flexible Application

From Pop-up Shops to Boats and Yachts, the CCTV Router can be deployed anywhere.

Super Fast Set Up

Our experienced Projects Team will have your Router up and running in a matter of minutes.

Instant Connection

Once installed your CCTV System will have Mobile Broadband access immediately.

Enhanced Security

The Router utilises private APNS and the secure Gemini Platform to keep your data protected.
